ABOUT

I'm a 23-year-old architecture student at KU Leuven, finishing my bachelor thesis. Visual making is the through-line — I learned to edit by hand first, then went straight into generative AI for stills, film and sound.

I want to work on real creative briefs. Image consistency, character continuity and a real hand on the work matter more to me than a one-click look.

A few AI videos and tracks I originated went viral and were later reused.

SKILLS

SOFTWARE

Adobe Photoshop
Adobe Illustrator
Final Cut Pro
AutoCAD (2D, 3D, ArchiCAD)
Rhino
SketchUp
Blender

VIDEO

Veo
Sora
Kling
Seedance
Runway
CapCut

IMAGE

Midjourney
Nano Banana
Imagine
Leonardo
Canva

SOUND

Suno

HOW I MAKE VIDEO

I generate sound on its own (Suno), then I edit so the track locks to the picture. I stay on image and character consistency — the piece should feel directed, not auto-assembled.

EXPERIENCE

Personal practice

Ongoing

Photo, video and montage, learned by hand. When AI arrived I jumped in — stills, film, sound. I hold the image and the characters consistent, and I keep control of the cut.

Architecture school — KU Leuven

2021 — now

2D and 3D, concept work, space and representation. Academic projects in composition, light and form.

EDUCATION

Bachelor of Architecture — KU Leuven
Final year. Bachelor thesis in progress.

2021 — 2027
